

In addition to the examination and paperwork, which can only be performed by a licensed civil surgeon, the following examinations/immunizations are required and may be done by any other provider. Proof of these examinations may be brought in by the patient or faxed/emailed as indicated below.

### **Adult (>15 y.o.) Requirements for I-693**

- 1- Lab testing to rule out Syphilis (VDRL or RPR) within past 1 year
- 2- Tuberculosis screening (PPD or Quantiferon Gold) within past 1 year
  - *Should Tuberculosis screening be positive, a chest x-ray is also required.*
  - *If history of past (older than one year) positive TB screening test is documented, this documentation may be provided along with a chest x-ray result (must have been performed within the past year). Verbal history of positive TB screening in the past **will not** be accepted by USCIS.*
- 3- Tetanus vaccine documentation within past 10 years
- 4- Proof of immunity to Measles, Mumps and Rubella (IgG's or immunization documentation)
- 5- If no history of varicella (verbal history acceptable), provide proof of immunity to Varicella (IgG's or immunization documentation)
- 6- Flu vaccine for this season (if October 1 through March 31)

*If possible, please fax results to 510.550.2644 or send via secure email to [admin@rootsclinic.org](mailto:admin@rootsclinic.org).*
